F.A.I.R bolsters Iside collection

The elegant spirit of Italy finds itself within the Iside Prestige models, a new release from Italian shotgun manufacturer F.A.I.R, that builds on the already popular Iside range.

The innovative solutions of the Iside project matched with the use of high-level materials has allowed the F.A.I.R team to reduce sections of the Iside action body, with such a containment space and weight that the use of an aluminium alloy base is insignificant.

The Iside Prestige models are produced with an automatic ejector through large ejectors and slender round profile side plates and they distinguish in two versions: Iside Prestige and

Iside Prestige Tartaruga Gold.

The aesthetic presentation that differentiates them are the chromed action for the Prestige version and colour-hardened action with gold subjects and wooden butt plate for the Prestige Tartaruga Gold version.

The Prestige version is produced in classical gauges of 12, 16, 20, 28 and .410.

Alongside the Prestige versions, the Iside family, in its smooth bore versions, includes the "Iside" with manual

extractor; "Iside EM", with triple depth laser engraved action and automatic ejector through large ejectors; "Iside Tartaruga Gold" with colour-hardened action, gold subjects and wood recoil-pad and "Iside Gardena" that has a double trigger / single trigger shooting system, ejector and divergent barrels, in order to have a large bullet group in shooting both shots with the rear double trigger actioned first.
